Essential Security Measures for Corporate Internet Banking

Internet Banking setup & administration guidelines

- Segregate responsibility: Assign different employees as initiators and authorizers.
- Multiple Levels of approvals: Ensure joint transaction approvals by two or more authorizers.
- Regularly updated user Email IDs and mobile numbers: Notify the bank immediately in case of changes in any user information.
- Disabling user ID: Set up a process to disable the user ID for an employee no longer authorized to have Internet Banking access. Government and Private Entity must submit to the bank the additional service form filled to disable the user ID. This process can take up to one week. The company is responsible to physically take the secure token from the user to ensure no transactions can be made. The responsibility for submitting such requests and validating users have been disabled will be the customer's. The customer will where applicable request confirmation from the bank when the user access is removed/ deactivated. Only then can the company rely on deactivation/ user removal being completed.
- My profile section: Regularly check and update "My Profile" of Internet Banking.
- Change of passwords: Strong passwords should be created with a combination of alphanumerical and special characters and login passwords should be periodically changed.

IT & internal system related guidelines

- Ensure and update safe & sufficient IT controls within the company including firewalls, anti-spyware etc.
- Limit exposure to Internet content & block access to any site/web address that is not relevant to business needs.

User responsibility and education guidelines

- Users should never share sensitive information like user passwords, PIN numbers and OTPs (one time passwords) with anyone or through any suspicious channel of communication.
- Educate your Internet Banking users through periodic Internet Banking training about Internet fraud.
- Users should be encouraged to use the security feature of bank's Internet Banking system like Virtual Keyboard, Norton Secured URL verification etc.
- Inform the Internet Banking users not to open email attachments

or visit website links which they suspect are of suspicious origin.

- The concerned Government and Private Entity should sign a security agreement, acknowledging that they will make proper use of the Government and Private Entity computer, systems and Internet Banking access.
- Use the correct URL of Internet Banking. Don't use random URLs shared by others without verification.
- Users must always logout from his/her account when leaving his/her computer unattended.
- Keep checks on the last login specifics and last unsuccessful login date and time details.
- Avoid saving user IDs & passwords in the browser or writing them down.
- Verify the underlying documents for a payment while initiating and approving the payments.

Confirmation of Government and Private Entity

We undertake that these essential measures have been communicated to all the Internet Banking users and related departments within our organization.

We understand that the enhancement of platforms, systems, processes related to payments is an on-going activity and we shall continue to take the necessary measures required for the safe usage of these platforms.

These suggested measures are indicative and should not be construed as a complete list of measures. The organization should from time to time seek expert advice from their business/audit/IT and related departments to further strengthen the processes and systems around the corporate Internet Banking platform and internal payment platforms of the organization.
